Application. Job

Software Engineer Intern

Tech, Skill

Coding more, Thinking more See the bigger world, change the world

Be interested in Cloud, Distributed, Compiler, OS, son develop Front-end

■ Basic Info

Personal Information: LinHaoXiang / Male / 20 Old Education: Bachelor / Center South University / EE

English: CET-6

Blog: haoxiang47.github.io

GitHub: www.github.com/haoxiang47

■ Internship Experience and Personal Project

Ant Financial-Alibaba Group (2015.7 - 2015.11)

Data Develop Intern

- * Complete Alipay+1.0's some data requirement.Writing SQL script to complete ETL and Deploy to ODPS
- * Complete "11.11"'s Data Live Screen, which using to see the real time data change. Back-end using Galaxy, which is a distributed real time computation system, to read Data from Mysql, Oracle, Ocean Base and other databases.
- * Complete Front-end and some data logic in Back-end, and finally bring it online.

Cloud Bussiness Unit-Cheetah Mobile (2014.9 - 2014.11)

Software Engineer Intern

- * Complete Clean Master's Daily data requirment using Python to finish ETL
- * Take part in a new Computing Framework's Develop .Improve Hadoop Mapreduce
 Framework, expand use of memory, decrease I/O. Let jobs to be a DAG graph to be beneficial to Chain
 Job. Finally pass the test and improve the compute speed to 10 times compare to Mapreduce

Personal Project

Mars

- * A simple script language implement by myself
- * Implement Scanner, Syntax analysis, Symbol Table, Semantic analysis. Reference to CPython's bytecode to complete code generate.
- * Implement a stack-based Virtual Machine to parser the bytecode and simulate CPU's stack
- * The Project is optimezing.the project using python to implement,prepare to refactoring using C language.perfect syntax and add OOP characters and so on.

MiniKV

- * Complete a Distributed K/V databases according to mit-6.824
- * Using Primary/Backups design to complete Fault-tolerant
- * Complete Paxos
- * Complete data slice and consistent hash

Personal Skills

Distributed System

Hadoop / Mapreduce

- * Familiar with Mapreduce theory and HDFS design
- * Have experience in mass data processing and experience in optimizing distributed jobs

Spark

- * Familiar with Spark RDD operating theory
- Have experience in mass data processing using Spark
- * Familiar Spark Job's operating in logic and physics

Web Development

- Using back-end framework such as Spring MVC,Django,Ibatis to complete a web applocation
 Using jquery,jqueryUI to complete page layout
 - * Build simple Nodejs application
 - * Using Git/Vim/Sublime/IntelliJ to complete development usually.Two-years experience in Linux/OSX

林豪翔的简历

■ Contact. 联系方式

- ♣微信: haoxiang32

Application. 应聘岗位 来发家习生/分布式来发

■ Tech. 技能点

努力coding并正在学习学院 派编程的IT新人

能玩命,常见到凌晨四点的各 个地方

喜欢研究云,分布式,编译器,OS,偶尔搞搞前端

在不断实习中看见更大的世界,research更有趣的技术,改变这个世界

■ Basic info. 基本信息

个人信息: 林豪翔 / 男 / 20岁

教育经历: 本科 / 中南大学 自动化 / 2017年应届生

英语水平: CET-6

Blog: haoxiang47.github.io

GitHub: www.github.com/haoxiang47

■ Experience. 项目与工作经验

阿里巴巴-蚂蚁金服集团 (2015.7 - 2015.11)

● 数据研发实习生

完成Alipay+ 1.0 日本的部分数据需求,通过写SQL的ETL脚本并且部署到ODPS上完成需求 完成了双十一B2B国际站的实时数据直播大屏。后端通过Galaxy实时计算引擎从mysql,oracle, OceanBase读取数据

独立完成前端和后端部分逻辑、最终项目在双十一作战室直播

猎豹移动-云事业部(2014.9 - 2014.11)

● 开发实习生

使用Python完成了Clean Master的日常数据需求脚本,完成了ETL的部分参与了内部计算框架的开发,改进hadoop的Mapreduce框架,加大了内存的使用,减少了IO,并且让Job形成DAG形式,有利于Chain Job的运行。最终测试在部分场景下速度可以达到Mapreduce的10倍

个人项目

Mars

自己实现的一个简单的脚本语言

自己实现了词法分析,语法分析,符号表,参考了Cpython的bytecode来生成中间的IR 后端自己实现了一个stack-based的虚拟机,通过读取前端parser生成的bytecode来模拟栈的运行项目还在不断完善和优化,整体用python实现,正在将VM用C重构,并且完善语法,加上OOP的特性

MiniKV

根据mit-6.824课程实现的一个分布式K/V的databases

利用primary/backups设计完成了fault-tolerant

完成了Paxos

完成了数据切片以及一致性hash

正在完成数据的持久化,将数据存储到disk可以随时查询,之后会和HDFS等分布式的FileSystem相结合

■ Skill. 技能清单

分布式

Hadoop / Mapreduce

熟悉Mapreduce的原理,熟悉HDFS的架构 有过海量数据处理经验,有过优化分布式job经历

Spark

熟悉Spark的RDD运行原理 有过Spark处理海量数据并且调优经验 了解Spark Job的逻辑执行和物理执行

Web开发

 使用Spring MVC,Django等后端framework搭建过web服务 使用jquery, jqueryUI完成前端的页面布局 能够搭建简单的nodejs应用 日常使用Git/Vim/Sublime/IntelliJ 完成开发工作,两年Linux/OS X使用经验
